

**End Term Practical Examination June 2021**  
**Cloud Computing Lab (PCS 451)**

**Note: Attempt any TWO questions.**

**MM: 30**

1. Write the necessary steps with the output screenshot to create VPC (Virtual Private Cloud).
2. Write steps to create Lambda function using Python. Also attach the output screenshot.
3. Write the steps to create a repository, upload the contents and publish the repository through GitHub Pages.

**Important:**

**Make sure you all attach the screenshots of the output that you have generated. Without which the practical will not be considered.**

**Write the steps in A4 sheets only.**

**Sign each page and convert the file into pdf, along with the output attached.**
